EDUCATION

Sri Eshwar College of Engineering	B.E.(CCE)	CGPA: 8.14	2023-2027
Government Higher Secondary School - Vellithiruppur	CLASS XII	81%	2022-2023
Government Higher Secondary School - Vellithiruppur	CLASS X	PASS	2020 -2021

INTERNSHIPS

FULL STACK development – Better Tomorrow	Jan-2025
Completed hands-on training in MERN Full Stack Development and developed a dynamic web application using MongoDB, Express.js, React.js, and Node.js. Strengthened skills in full-stack development, REST APIs, and database management.	
Modern Full Stack Development – AlgoTutor Academy	Jul-2025
Gained hands-on experience in building modern web applications using React.js, Next.js, NoSQL databases. Enhanced skills in full-stack development, API integration, and database management through practical implementation.	

PROJECTS

Hospital OPD Management System	2026
Designed and developed a full-stack Hospital OPD Management System to streamline patient appointments, doctor consultations, and hospital administration workflows. Built dedicated Patient, Doctor, and Admin modules with appointment scheduling, department management, doctor allocation, and real-time queue tracking using Socket.IO. Implemented secure RESTful APIs, role-based access control, and MongoDB database integration to ensure efficient healthcare data management and seamless frontend-backend communication.	
Queue Management System for Bank	2025
Designed and developed a full-stack Queue Management System to streamline customer flow and reduce waiting times in banking environments. Implemented automated token generation, queue position tracking, and customer management using React.js, Node.js, Express.js, and MongoDB. Developed an admin dashboard to monitor queue status, view customer details, and manage service completion through secure RESTful APIs. Improved service efficiency by organizing customers based on a First-In-First-Out (FIFO) queue mechanism and providing real-time queue visibility.	
AI-Powered Health Monitoring and Assistance System	2025
Designed and developed a full-stack healthcare application that enables users to securely log and monitor vital health parameters such as blood pressure, blood sugar, pulse rate, oxygen saturation, temperature, and weight. Implemented JWT-based authentication and MongoDB Atlas integration for secure data management, along with automated health-risk detection to identify abnormal vital readings. Built interactive data visualizations using React and Recharts to help users track health trends, and integrated an AI-powered medical chatbot to provide health guidance, symptom awareness, and preventive care recommendations.	

TECHNICAL SKILLS

Languages: C++ | Java | JavaScript
Core Concepts: DSA | DBMS | OOPs | Problem Solving
Web Technologies & Frameworks: HTML | CSS | JavaScript | React.js | Node.js | Express.js
Database: MySQL | MongoDB
Tools: Git | GitHub | Postman | VS code | Canva

ACHIEVEMENTS

CODECHEF: [codechef](#) | Solved 700+ problems (**GOLD BADGE**) – 902(div 4), codechef rating -1120
LEETCODE: [LeetCode](#) | Solved 180+ problems with a rating of 1500, rank: 863,606
HACKERRANK: [Hackerrank](#) | Earned C++ (Gold), Java (Bronze), Python (Bronze) Badges.
Mini Project Expo : Won 3rd prize in project expo conducted by Sri Eshwar College of Engineering

CERTIFICATIONS

LinguaSkills Business certificate	2026
Full-Stack Web Development - Udemy certificate	2025
Data Structures using c/c++ - Udemy certificate	2024
Python Bootcamp-Udemy certificate	2024
Data Structures (Linked List) – Code Chef certificate	2024
